

Editor workflow in GoodDay

One job, from the moment it lands on you to the moment it is approved. Every step shows you the screen and where to click on it. Read it once, then come back only when something new happens.

THIS PAGE IS ONLY ABOUT THE WORK

Logging your day, asking for time off and everything about leave now live in **Attendance & Compensation Policy**, a separate document for the whole studio. Where files go on Drive is in the **Filing system guide**. This page is the job, and nothing else.

A JOB, FROM START TO FINISH

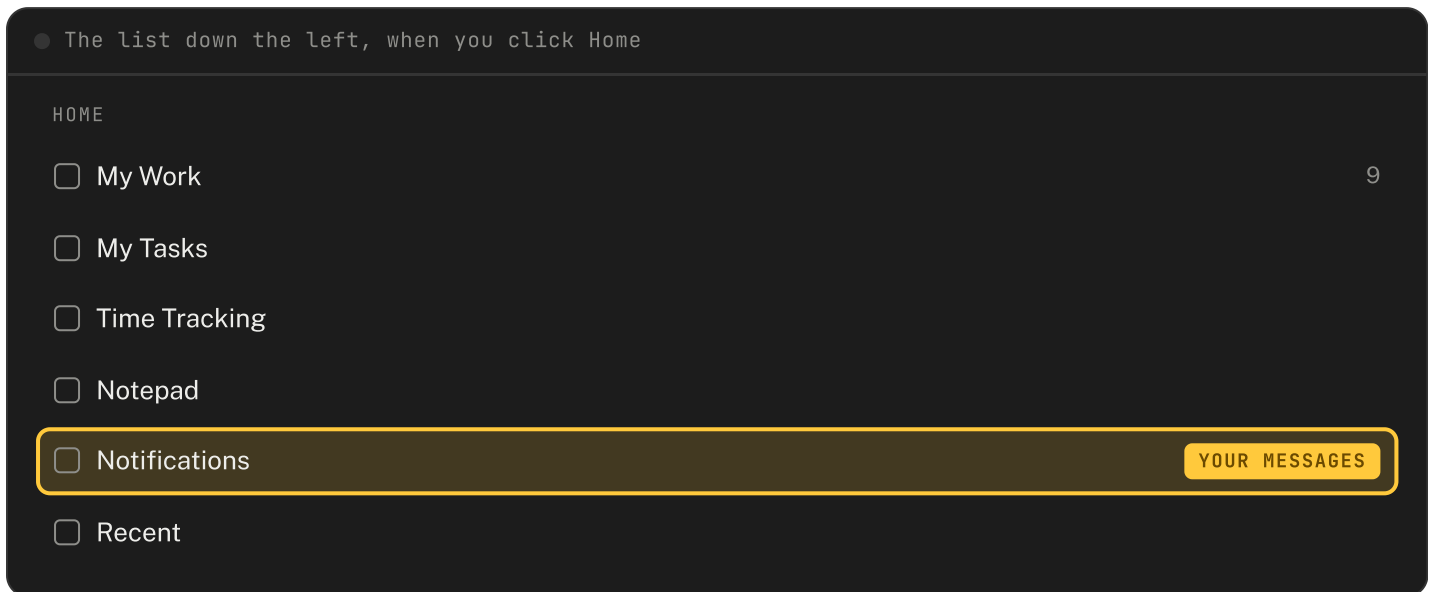

The coloured steps are the ones where the job is on your desk. On the other steps someone else has it. You do not need to hand it over and you do not need to chase it back. The board does that.

01 A new job

You will be told. You never have to go looking for work on the board.

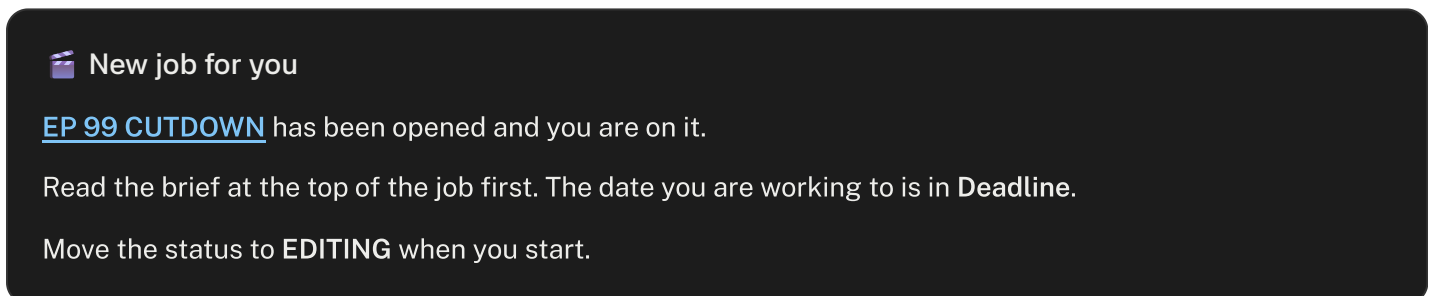

1 Find your messages

GoodDay does not email you. It tells you things inside the app, in two places, and they show the same things.

Notifications is everything GoodDay has told you. There is also a bell icon in the top right corner of the window that opens the same list, if that is quicker. My Work next to it is the other one to know: that is the list of jobs waiting on you right now.

A message about a new job looks like this. The blue job name is a link.

Click the job name to open the job. If you would rather not go through messages at all, My Work shows you the same jobs without the reading.

IF YOU HAVE NEVER USED SOMETHING LIKE THIS BEFORE

You do not have to check anything on a schedule, and nothing here is a chat you have to keep up with. A job only appears in My Work when it is genuinely your turn, and it leaves by itself when you hand it on. If My Work is empty, there is nothing waiting on you.

● PRO-15 • EP 99 CUTDOWN

EP 99 CUTDOWN

15 second teaser for IG, vertical. Client wants the interview beat at the top, then B-roll. Music from their brand kit. Subtitles burned in.

The brief sits at the very top of the job, under the title. You do not have to hunt for it.

This is what the client first asked for. It is written once when the job is opened and it never changes, not even after five rounds. That way you can always check what was actually promised.

Notes for one particular round are not here. Those go in Revision brief, further down the job, and on that round's ticket. This top box stays as first written.

3 Look at Deadline. That is your date

● PRO-15 · EP 99 CUTDOWN

Status	TO DO	
Action required	You	
Assigned to	You	
Deadline	Sep 18	YOUR DATE
Start / End	Sep 8 – Sep 30	
Estimate	16 hours	

The top of every job looks like this.

BOX	WHAT IT MEANS	DOES IT MOVE?
Deadline	When this round is due back. The only date you work to.	Yes, every round
Start / End	When you picked it up, and the date the client was promised the finished film.	No
Estimate	How big the job was judged to be. Shown in hours. One day is 8 hours.	Rarely

THE MISTAKE PEOPLE MAKE

Working to the End date. The End date is weeks away. It is when the client gets the finished film, after every round of notes. Deadline is when this cut is due with your SPV, and it is usually much sooner.

02 While you cut

1 Click the status at the top of the job

● PRO-15 · EP 99 CUTDOWN

Status	TO DO	CLICK
Action required	You	

2 Choose EDITING

Status

■ TO DO

■ EDITING

■ INTERNAL REVIEW

■ INTERNAL REVISION

■ FINAL REVIEW

■ CLIENT REVISION

■ CLIENT REVIEW

■ APPROVED

CLICK

You will only ever pick two from this list: EDITING and INTERNAL REVIEW.

Do this when you start, not when you are halfway. It is how anyone can see what is being worked on right now.

3 If the deadline is tomorrow, you get this message

Due tomorrow

 EP 99 CUTDOWN is due tomorrow.

That is the date sitting in the **Deadline** box on the job. If it is going to slip, say so today. Tell your SPV now, not tomorrow morning.

If a new date has already been agreed and nobody moved it, ask them to update **Deadline** so the board is telling the truth.

Sent at 7am the day before. It only comes while the job is on your desk, never while someone else is reviewing it.

WHAT TO DO ABOUT IT

If you will not make it, tell your SPV the same day you get this message. A day's warning gives them time to move things around. Telling them on the morning it is due does not.

4 Start the timer when you start work

GoodDay can time you while you work, so you never have to remember or guess afterwards. Press start when you sit down, press stop when you get up. That is the whole job.

Step one. Find Time Reports. Open the job. Down the right-hand side is a long column. This is the top of it, and none of this is what you want yet.

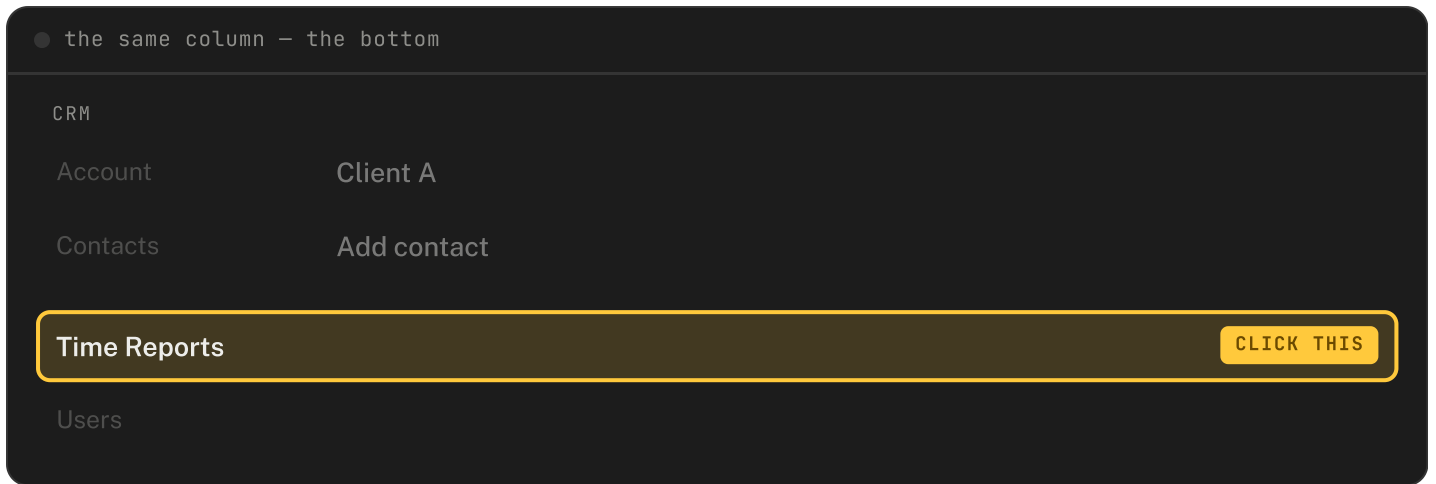

● the column down the right – the top

Status	EDITING
Action required	You
Assigned to	You
Deadline	Sep 18
Start/End	Sep 8 – Sep 11
Estimate	16 hours
All fields	
CUSTOM FIELDS	
Brief document	
Main Asset	
Revision brief	
Project #	
Project Owner	

Everything above is somebody else's to fill in. Keep scrolling.

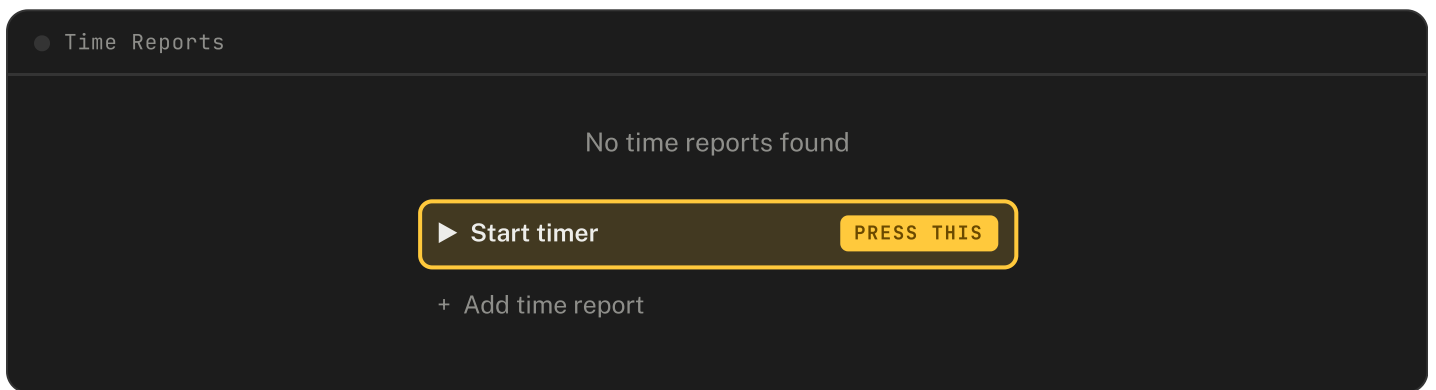

keep scrolling to the very bottom of that column

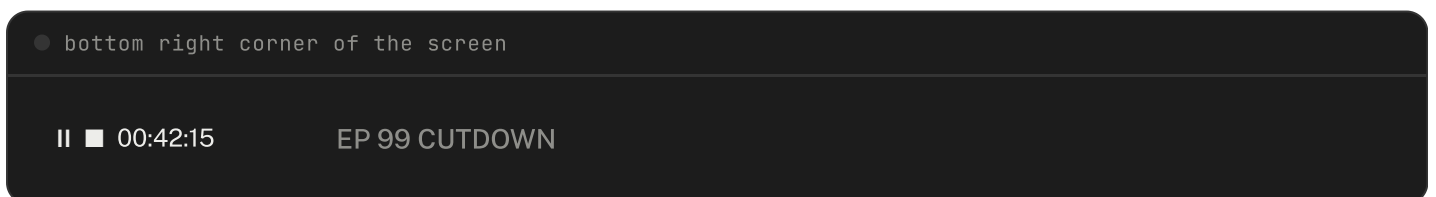

Time Reports is the second heading from the bottom, just after CRM and just before Users. If you can see Users, you have gone one step too far.

Step two. Press Start timer. The middle of the screen changes. The first time it says No time reports found.

Press Start timer and go and work. Nothing else to do.

Step three. A small bar sits at the bottom right of your screen while it runs. It shows the job and the clock. You can leave it alone all day.

The two buttons are pause and stop. Pause for lunch or a long break. Stop when you have finished working on that job.

Step four. Press stop, write one line, submit. A box opens with your time already filled in, so there is no arithmetic.

Time reported

Already filled in by the timer. Leave it.

42m

Report date

Already today. Leave it.

Sep 20

Start-end time

Already filled in. Leave it.

6:46 pm – 7:28 pm

Is Billable

Already on. Leave it.

on

Comments

THE ONLY THING YOU TYPE

One short line saying what you did this session.

Assembly and first pass

Then press Submit. Four boxes fill themselves and you write one sentence.

START A NEW TIMER FOR EACH JOB

The timer belongs to one job. If you switch to a different job, stop the first timer and start one on the second, or the whole afternoon lands on whichever job you happened to open first.

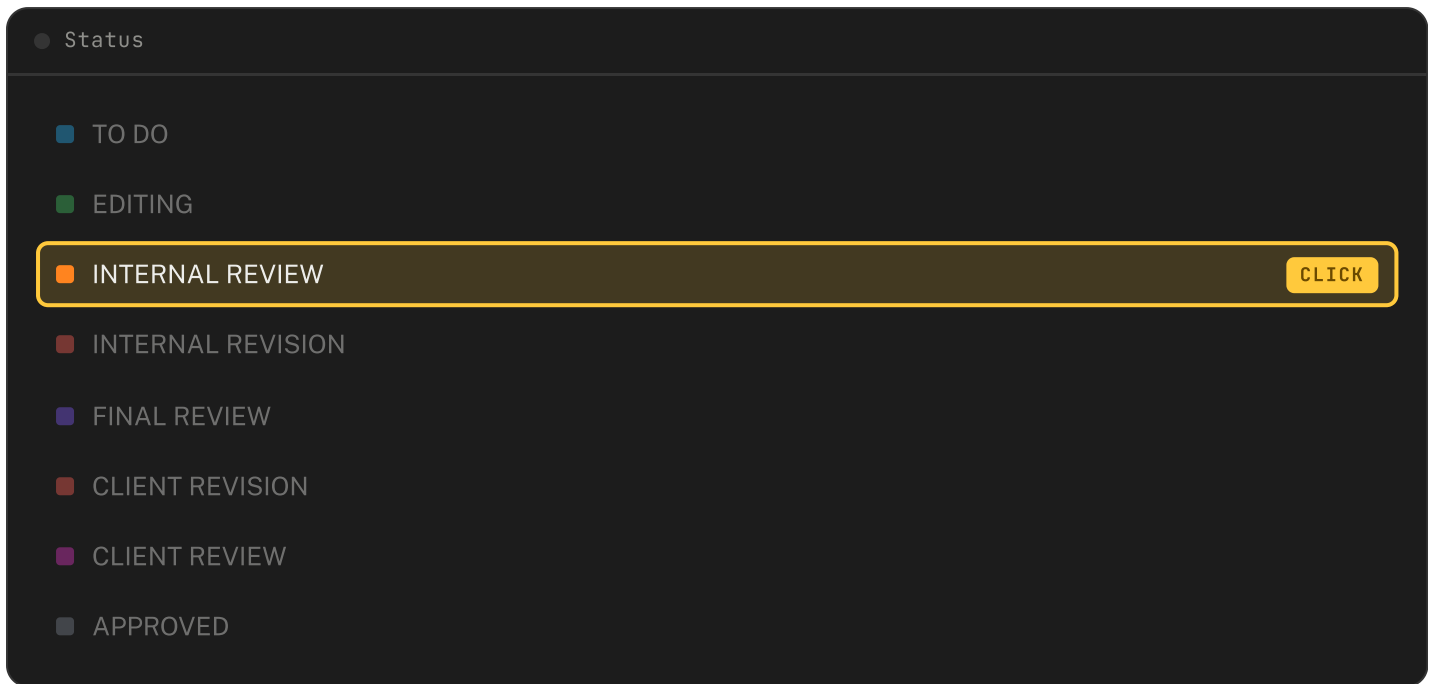

ESTIMATE IS A DIFFERENT NUMBER, AND IT IS NOT YOURS

Further up the same column there is a box called Estimate, usually reading something like 16 hours. That is your SPV's guess, made before you saw the job. It is not a target and you do not correct it. Time Reports is what it really took. The two are meant to be different.

03 Sending it in

One status change. Nothing else.

1 Click the status and choose INTERNAL REVIEW

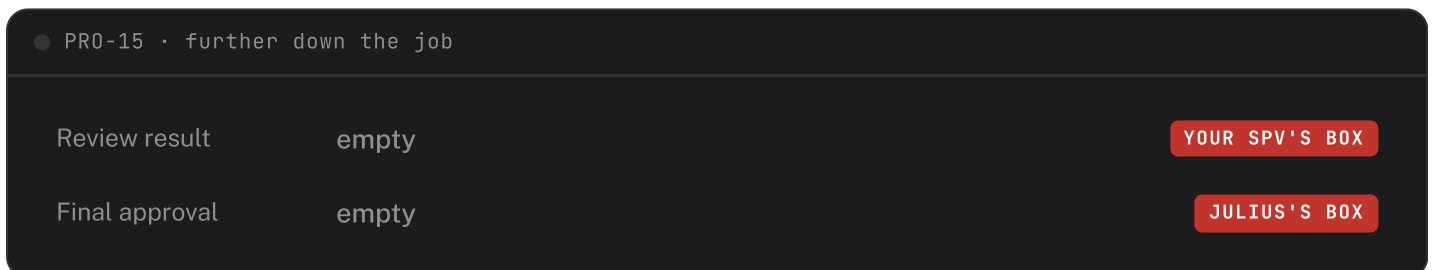

● Status

- TO DO
- EDITING
- INTERNAL REVIEW CLICK
- INTERNAL REVISION
- FINAL REVIEW
- CLIENT REVISION
- CLIENT REVIEW
- APPROVED

That is the whole handover. Your SPV gets a message and the job moves into their list. You do not need to tell them in chat or tag anyone.

2 Leave these two boxes alone

● PR0-15 · further down the job

Review result	empty	YOUR SPV'S BOX
Final approval	empty	JULIUS'S BOX

DO NOT FILL THESE IN

If you set one of them yourself, the job jumps forward and skips the check it was supposed to get. You never need either box.

After that, stop thinking about it. If it needs more work it comes back to you on its own, with a ticket that says what to change.

04 When it comes back

This part works differently from ClickUp. Read it properly once.

1 You get a message. The job is already back on you

Changes wanted

[EP 99 CUTDOWN](#) has come back for changes.

What to change is in **Revision brief** on the job, and on the new ticket underneath it. The date for this round is in **Deadline**.

The status will be one of two things:

- **INTERNAL REVISION**: your SPV or Julius wants changes. Nobody outside the studio has seen it.
- **CLIENT REVISION**: the client has seen it and wants changes.

2 Scroll down to Subtasks and open the newest ticket

● PRO-15 · Subtasks

- | | |
|--|--------------|
| ☐ Internal revision 1 | closed |
| ☐ Internal revision 2 | closed |
| ☐ Client revision 1 | closed |
| ☐ Client revision 2 | CLICK |

Every round leaves a ticket behind. The numbered one at the bottom is the round you are on now.

3 Read the ticket. It says what to change

● PRO-39 · Client revision 2

What the client asked for

Cut the intro by 3 seconds. Music too loud under the VO from 0:08. Use the wider shot at 0:14 instead.

Everything they sent

 client-notes-r2.pdf · [frame.io link](#)

The deadline for this round is on the job, in the box called **Deadline**. Set this ticket to **ROUND DONE** when the round is finished.

The notes and the files are on the ticket. The same notes are also in **Revision brief** on the job, so either place works.

4 Go back to the job and check Deadline

● PRO-15 · EP 99 CUTDOWN

Status **CLIENT REVISION**

Deadline

Sep 22

NEW DATE

Your SPV or Julius put the new date here when they sent it back.

THE DATE IS NOT ON THE TICKET

Look at Deadline on the job, not on the revision ticket. One box, one date, every round. That way you never have to work out which of several dates is the live one.

5 Do the work, then set the ticket to ROUND DONE

Open the revision ticket, click its status, and choose **ROUND DONE**. That status exists only for revision tickets. Never put it on a job.

● PRO-39 · Client revision 2 · Status

■ TO DO

■ EDITING

■ **ROUND DONE**

CLICK

A revision ticket shows the same status list as a job. Ignore all of it except ROUND DONE.

LOG THE ROUND'S TIME FIRST

Before you close the ticket, put the hours for this round in Time Reports on the job. Not on the ticket, on the job, so all the rounds add up in one place.

This is the number that shows how much a revision round actually costs. Two rounds that both look like "one round" on the board can be an hour and a day and a half, and only the time says which was which.

6 The job moves itself to INTERNAL REVIEW

● PRO-15 • EP 99 CUTDOWN

Status

INTERNAL REVIEW

AUTOMATIC

Action required

Your SPV

Once every ticket on the job is ROUND DONE, the job moves and your SPV is told. You do not touch the status.

If there is still another ticket open on the job, nothing moves yet. Finish that one too.

Every round goes back through INTERNAL REVIEW, including client rounds. Your SPV sees it before the client does, every time.

TWO BRIEFS, AND NEITHER IS YOURS TO EDIT

The brief at the top of the job is the original ask. It stays as written for the life of the job. Revision brief, further down, is what to change this round, and your SPV or Julius rewrites it every time the job comes back. Read both. Change neither. If either looks wrong, tell your SPV.

In ClickUp the brief got overwritten every time new client notes arrived, and by round four nobody could see what was first asked for. That is the habit this split exists to stop.

05 Boxes you never touch

Six of them. Everything else on a job is fine to use.

● Not yours

Review result	Your SPV at internal review. Julius at client review. Setting it moves the job.
Final approval	Julius only. Approving tells the studio the file went to the client today.
The brief at the top	The original ask. It stays as written for the life of the job.
Revision brief	What to change this round. Your SPV or Julius writes it each round.
Deadline	Your SPV and Julius set this. Ask them to change it rather than changing it yourself.
Estimate	Set once at intake, before you saw the job. Log what it really took in Time Reports instead.

Things that happen without you

WHEN	WHAT HAPPENS BY ITSELF
A job is opened with you on it	You get a message with a link to it
You set INTERNAL REVIEW	The job moves to your SPV and they are told
Someone asks for changes	The job comes back to you, a numbered ticket is made and given to you, and you are told
7am the day before a deadline	You get the due tomorrow message
The job is approved	It clears out of everyone's list

Action required on a job tells you whose turn it is. If it says you, the job is waiting on you. If it says someone else, it is not.

06 Quick list

1. **DeadLine** is your date. Not Start/End.
2. The brief is at the top of the job. **Revision brief**, further down, is what to change this round.
3. **EDITING** when you start. **INTERNAL REVIEW** when it is ready. Those are your only two status changes.
4. Revisions arrive as a numbered ticket. Read it, do it, set the ticket to ROUND DONE. The job sends itself back.
5. Log your hours in **Time Reports** on the job before you stop for the day. Roughly right is right enough.
6. Where the files go on Drive is the **Filing system guide**, not this page.
